

WIN WITH

Super TurboTreater®

The Ipsen Super TurboTreater® is a superior vacuum furnace designed for larger load capacities for the processing of dies, tools, and parts with complicated geometries.

- Multi-directional cooling and isothermal hold functionality (7 possible cooling modes and cooling gas flow is programmable for various geometric loads and part sizes)
- Reliable water-cooled motor with LCP (low-current-power) start
- Convection-assisted heating that reduces cycle time and improves temperature uniformity spread during heat up
- The excellent quench speed of the Super TurboTreater® allows heat treatment in accordance with the latest GM die block heat treatment specifications

To get your Super TurboTreater® contact Ipsen's sales department at 1-800-727-7625.
