April 2, 2007(ROCKFORD, IL) – Ipsen fulfills an order from Metal Improvement in Wichita, KS, for an Ipsen Model H6660 2-Bar TurboTreater Horizontal Vacuum Furnace with a work zone size of 48” wide x 48” high x 60” deep. Metal Improvement currently has two (2) Model H4848 2-Bar TurboTreaters at this location as well. With its patented gas quenching system, the TurboTreater continues to set the industry standard for quenching speed, energy efficiency, and repeatability in hundreds of installations worldwide. Metal Improvement, is a world leader in providing metal treatment services for critical components operating in aerospace, automotive, power generation, chemical processing and specialty industrial applications. The metal treatment services they offer will enhance the performance and extend the life of these critical components by helping prevent premature fatigue and corrosion failures.
