IPSEN UNVEILS NEW TURBOTREATER® TECHNOLOGY AT OPEN HOUSE

Date: 11/14/07

Rockford, IL – Attendees at the Global Heat Treat Summit in Rosemont, IL were given the opportunity to be the first to see the new TurboTreater® technology unveiled at Ipsen's Open House on November 9th at their Rockford Showroom. The social event consisted of product presentations on the new technology by Ipsen's team of experts and an informative plant tour. The TurboTreater® boasts many new features, which promote simplicity of maintenance, speed of assembly, and ease of automation. The new technology has a proven procedure for changing out the Hot Zone in less than 60 minutes. Patrick McKenna from Nevada Heat Treat was one of the guests at the open house and stated that he was impressed with Ipsen's ability to combine a clean modern appearance with improvements that deliver measurable benefits to the user.
