Ipsen Announces Titan Road Show Schedule

(October 13, 2009, Rockford, IL) Ipsen, Inc. announced today its inaugural Titan Road Show schedule, starting in late October. A fully functional Titan vacuum furnace has been installed on a specially equipped flatbed trailer with colorful sidewall curtains, and will be making its way from Rockford IL to Souderton PA for its first public appearance. Titan will be available for registered visitors to see the furnace first-hand and speak with Ipsen staff about its features and capabilities. After Souderton, the Titan Road Show will make an appearance in Alpha NJ and the Cleveland OH area. Following is the official schedule:

- October 28, 29, 2009: Souderton PA
- October 30, 2009: Alpha NJ
- November 2, 2009: Strongsville OH

Persons located near each area who are interested in seeing Titan and speaking with an Ipsen team member must first register at www.ipsenusa.com/roadshow_landing.html, or by phone to the Titan Hotline at 800-365-8879. Additional Road Shows are planned for other areas of the country. Those schedules will be announced at least two weeks prior to each departure.

About Titan

Titan is a self-contained, highly mobile, skid-mounted system with fast utility hookups which installs in just one day. Titan's simple-to-master control system supports 17 languages, switches easily between

imperial and metric units of measure, provides real-time data acquisition, trending and archiving, and stores up to 1000 recipes. An expert controls option, with interactive program generation feature, even provides recipe suggestions based on the customer's metallurgical needs. Other available options include; a high vacuum system, a loader system, a closed-loop water system, and all-metal hot zone, allowing customers to customize their purchase to address their Thermal Processing needs.

Titan's manufacturing versatility, operational simplicity, and financial flexibility allow both heat treaters and OEMs alike to capitalize on profitable opportunities and reduce costs in a challenging economy.

About Ipsen, Inc.

Ipsen, Inc. designs and manufactures thermal processing systems including vacuum heat treating equipment, atmosphere furnaces and advanced thermal process control systems. With manufacturing operations worldwide, the most sophisticated research and development facilities in the industry, and the largest installed base, Ipsen, Inc. offers innovative solutions and technical expertise to improve the efficiency and performance of your heat treating applications. Ipsen, Inc. maintains manufacturing plants in Rockford, IL, Souderton, PA, Kleve, Germany, Calcutta, India, Kyoto, Japan and Shanghai, China.
