"Some of the best training I have had in my 25+ years as a maintenance tech."

"Staff and facility are top notch and very knowledgeable in the heat-treating process."

"All of the questions that were answered are going to be a big help as we go through Nadcap accreditation."

Attend an Ipsen U course to build or refresh your knowledge of thermal processing equipment.
Attend an Ipsen U course to build or refresh your knowledge of thermal processing equipment.

Perfect for all levels of expertise, Ipsen U covers a range of topics in an easy to follow format. The three-day course includes an introduction to heat treatment, hands-on demonstrations, maintenance tips, an overview of furnace systems and controls, in-depth look at SAT and TUS procedures and more!

Participants interact with several Ipsen experts and can ask questions in a casual, open-forum environment.

Visit IpsenUSA.com/IpsenU to view course details, schedules and registration information.
